Dutch milk powder

Care for tomorrow

Milk powders from Dutch milk

The Netherlands has an outstanding reputation and performance with the production of milk. The cows graze on beautiful green paddocks resulting in high-quality milk and a beautiful sight on the landscape. A significant volume of all Dutch milk is now processed by Vreugdenhil Dairy Foods, Europe's biggest producer of full cream milk powder. The year-round supply of Dutch milk enables us to deliver the best quality of fresh milk powders to our customers.

Today we deliver the milk powder of tomorrow. We do this with the best milk, based on years of experience and with knowledge of our customers in the different markets. We are a family business, customer-oriented and involved. We tend to reflect these principles in our relationships with our customers. We specialise in milk powders. With four production sites in the Netherlands we process roughly 1.3 billion kilogrammes of milk per year, which we export to 130 countries worldwide. Thanks to our many years of experience in the production and distribution of milk powder, we know our customers better than anyone.

Care for tomorrow

Our focus on quality and food safety

Vreugdenhil Dairy Foods adheres to the highest hygiene and quality standards throughout the entire production and supply chain. The various quality inspections to which Vreugdenhil subjects its milk and powder, guarantee that each product reaching customers is of the highest quality. We test the milk powder every day in our lab for microbiological aspects and colour, smell and taste. Our modern production facilities are FSSC 22.000-certified and have been granted Halal, Kosher and Organic certifications. The COKZ (Netherlands Controlling Authority for Milk and Milk Product) oversees compliance with Commodities Act standards and EU legislation.

We guarantee quality from grass to glass

Our consumer products

Vreugdenhil Dairy Foods is able to supply a wide range of recipes. For example (instant) full cream, (semi) skimmed milk powder and fat filled powder in both tins and pouches of varying sizes. Vreugdenhil Dairy Foods enriches its milk powders with extra vitamins, minerals and fat filled powders, tailored to your needs.

Private label

Upon request, we also produce Private Label products in tins and pouches. We also have three brands, Two Cows, Hollandia Street, and Holland Horizon, positioned in the different markets.

Our tasty milk powders meet the demand for healthy nutrition

We process the fresh milk in our factories within 24 hours into the final consumer product. This ensures a delicious and fresh product, as well as a long shelf life and excellent solubility in hot and cold water.

Our products for the food industry

We produce great-tasting milk powder ingredients for the global food industry, such as ice cream, chocolate and yoghurt producers.

We now also produce ingredients for paediatric nutrition.

Our dairy expertise, manufacturing capability and commitment to sustainability helps us get the best out of every drop of fresh milk we collect.

Our team of specialists is looking forward to discussing your requirements, and offering you the best solution.

We create shared value for our suppliers, company, customers and their environment

Our focus on sustainable growth

Vreugdenhil Dairy Foods understands the importance of sustainability, which is a precondition for continuity. Therefore we have developed our sustainability programme, which shows our care for the world we live in. Our sustainability programme focuses on important pillars, such as sustainable dairy farming, sustainable purchasing, healthy and engaged staff members and nutritious products.
